

FIVE SENSES

Objectives: To understand that our five God-given senses play vital roles in teaching children and in their learning process.

Introduction

Using the five senses are important for every age group. However, if you are teaching pre-school kids, five senses are a **MUST**.

Preparation

Before you leave your house, make sure that you have different objects of

the five senses and that you have tested if they work.

For example, make sure that the soap or perfume that you want the children to smell has reasonable fragrance.

If you want children to taste fruit or bread, bring extra different stuffs in case some children are allergic to wheat.

Touching fluffy stuffs might be always pleasant for the little ones however make sure also that it does not make them sneeze.
